

## MAG2001 Cutting Torch

---

MAG2001™ top valve cutting torch operates in both oxyflame mode and oxyarc mode when connected to a welding power source.

Accommodates Magnum's newly patented exoBLADES™ and arcBLADES™ for the longest cuts on the market using less oxygen.

Acme threaded head and head nut prevents seizing from dirt and grit. A simple quarter turn of the head nut tightens or removes cutting rods for ultimate convenience.

3/8" collet accommodates all 3/8" cutting rods. Torch will also accommodate 1/2" and 1/4" collets.

Oxygen whip hose and cable lead with appropriate connections to existing hose and cable.

# MAG2001 Cutting Torch

---

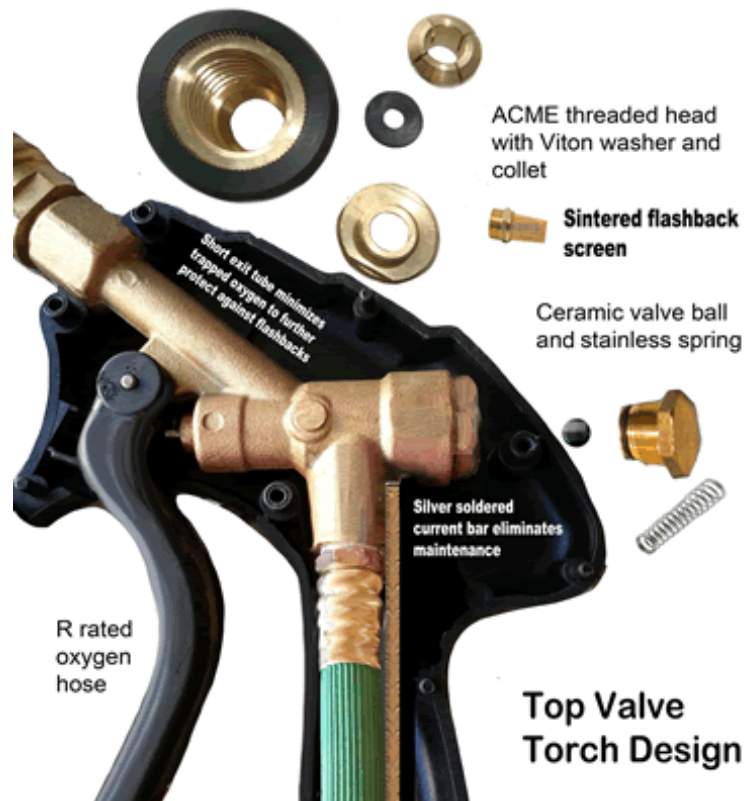

Stainless steel valve ball and spring will never wear out.

Thousands of Magnum cutting torches are currently working on land as well as underwater settings.

Optional remote control ignition button when purchased with the appropriate Magnum ignition system. Operators merely press the button to ignite exothermic cutting rods.
